CROP REPORTING BOARD 1985 CATALOG

The Crop Reporting Board (CRB) estimates production, stocks, inventories, disposition, utilization, and prices of agricultural commodities, and such other items as labor, farm numbers, and fertilizer. This catalog outlines all of the estimates and the dates they are available.

National reports are issued from the Washington, D.C. headquarters at 3:00 p.m. ET, unless otherwise noted. Individual State reports are issued from the State Statistical Offices (SSO) following release of the national estimates. Printed copies of both CRB and SSO reports are available for a fee.

Use the order forms on pages 31 and 33 to subscribe to national reports. Note that some reports are sold through the Superintendent of Documents, Government Printing Office, while others may be purchased directly from the CRB. Be sure to use the correct order form. Single copies of all reports can be purchased from the CRB.

Portions of selected national reports are available immediately after the 3:00 p.m. release time through nationwide electronic networks. Contact the CRB for information. The CRB also has a limited amount of agricultural data, including selected crop and livestock county estimates, on magnetic tape.

Subscription forms for State releases may be obtained from the appropriate SSO listed on page ii.

Scope and Methods of the Statistical Reporting Service

New, revised and expanded from the 1975 edition, this handbook explains how USDA's crop reporting agency surveys farms, ranches, and businesses to estimate crop and livestock production, stocks, prices, and other vital farm statistics.

Written for both general reader and specialist, the report is a valuable reference for all users of farm statistics, economists, statisticians, and agricultural librarians.

Chapters 1-3 describe the latest methods of designing surveys, collecting data, releasing crop reports. Chapters 4-11 cover estimating programs and reports issued for field crops,

fruit, vegetables, livestock, dairy, poultry, prices, and wages. New chapter 12 is devoted to the extensive research work underway to sharpen accuracy, streamline surveys, expand objective yield surveys, assess crops by satellite, and simulate plant growth by computer.

Includes tables, glossary, chronology, laws, regulations governing crop reports, and nearly 40 charts, maps, and illustrations.

NEW!

"Usual Planting and Harvesting Dates for Major Field Crops" was assembled by the Statistical Reporting Service, based on the best and latest information available. Information is arranged by States for major crops and by commodity for selected major crops. In addition, dot maps show major areas of production and isomaps show periods of planting and harvesting for specific crops.

Dates shown indicate the periods in which the crops are planted and harvested in most years.

Beginning dates indicate when planting or harvesting is about 5-percent complete and ending dates when the operations are about 95-percent complete.

The "principal producing areas" are areas of major importance in a State. They are designated by county or crop reporting districts, or as statewide.
